Work Experience

December 2014 Sainsbury's (Allende Ave, Harlow, CM20 2AG)

Temporary Nightshift

Joining Sainsbury's allowed me to experience a new type of work environment, where I stacked and dressed shelves. I develop skills such as attention to detail and organisation. To ensure that the whole job was completed, good communication was needed. Although we were all part of a team, I spent most of my time working alone and had to use my initiative to finish my work.

June 2012 Longwood Junior School (Harlow, Essex, CM18 7RQ)

Teacher Assistant

My role was to guide the children within the teacher's classroom. As this was my first week of work experience it helped gain a sense of independence. Instructions had to be followed carefully and when I had to teach the children unsupervised a lot of responsibility was required.

Other Relevant Experience

Over the past year I have completed a few editing jobs which have helped me develop a sense of good time management as the pressure of the deadlines challenged me to organise and structure my work into tasks to complete it in time.

I have also assisted my dad who is self-employed. This included editing videos and preparing DVDs. All of this work needed to be done without error and to a professional standard.

Qualifications

2008 - 2013. Stewards Academy - GCSE's

10 Subjects: 2 B's 5 C's including Maths and English

2013 - 2015. Harlow College - BTEC

Level 3 National Diploma in Information Technology with a DDM

2015 - Present. University of Gloucestershire

Computer Games Programming (**BSc Hons**)

Activities/Achievements/Skills

I have performed musically in front of an audience twice, this helped boost my confidence. As well as this, I have also climbed two mountains (Ben Nevis and Scafell Pike) which I am extremely proud to have finished. I am proud of achieving my punctuality and attendance awards which I received during my time at junior and secondary school. In my spare time I enjoy playing the bass guitar and working on my skills.

I have a more advanced skill in IT from my time studying IT in college, I am currently studying computer languages such as C++ and C#, I also have skills with game engine such as Unity. From past work experiences I have learned that I am able to work in a team and independently.
